Get to Know Your Body System

Choose a Body System and Become an Expert:

1. Use your textbook to choose a system that interests you (ex. Nervous, circulatory, respiratory, etc.).
2. **Websites**: Go to portaportal.com and go to the folder marked “anatomy.”
3. **Textbooks**: You can use your text, the sites on portaportal, or both to complete the questions below.

Final Product: Must be done in 2 class periods [must be completed at home if not completed in class]

1. Handwritten neatly.
2. Typed.
3. Brochure or poster.

Describe the following about your body system:

1. The **main functions** of the system
2. The **main organs** of the system
3. The different **levels of organization**. Be specific (cells, tissues, organs, system).
   a. The **structure** (how it's made) and **function** (what it does) of one of the organs in your system.
4. How the organs work together within the system
5. How this system works with one other system
6. 3-5 interesting facts about the system
7. Include at least 2 diagrams (explain your diagrams)
